Women's Rowing Sustainable Development Guidelines

D Gomes

The Women's Rowing development strategy was established and developed by FISA to increase the number of women rowers and raise the standard of women's crews around the world as well as the overall presence of women in all aspects of the sport of rowing

This document is FISA's response to the need to cascade, strengthen and monitor gender mainstreaming in Rowing through the establishment of a system for sustainable development.

Gender Mainstreaming involves not restricting efforts to promote equality to the implementation of specific measures to help women, but mobilising all general policies. This means systematically examining measures and policies.

This guide aims at providing your National Federation with practical ideas to help you build your own national pathway, embracing a culture that really wants to see women succeed.
